## The Ukraine Crisis and African Economies

### *Fertilizer Sector Disruptions: Exposure, Contagion, and Effects on Agricultural Productivity and Growth*

In response to the Russia-Ukraine conflict and its impact on African countries, AKADEMIYA2063 developed the Ukraine Crisis Brief Series, a comprehensive research series to provide evidence-based simulations of the ramifications of the crisis. Hinged upon data, analytics, and past crisis patterns, the AKADEMIYA2063 Ukraine Crisis Brief Series analyzes the economic and socio-economic impacts of global market disruptions induced by the Russia-Ukraine conflict. These research findings are published on AKADEMIYA2063's Ukraine Crisis and African Economies portal.

Session III of the AKADEMIYA 2063 Ukraine Crisis Webinar Series will discuss the key findings from AKADEMIYA 2063's analysis of global market upheavals in the fertilizer sector with a focus on exposure, contagion, and effects on agricultural productivity and growth.

Based on AKADEMIYA 2063's Ukraine [Brief 3](#), “Agricultural Productivity and Growth Effects of Fertilizer Sector Disruptions”, and [Brief 8](#), “Contagion and Exposure of African Countries to Global Fertilizer Trade Disruptions”, the session will analyze the overall impacts of fertilizers sector disruptions on Africa’s agriculture productivity. The speaker will also discuss how the disruption of global fertilizer markets is expected to reduce fertilizer use for all crops in the countries covered by the study and the potential impacts of the reduction in fertilizer use on agricultural sector outputs.
