The Ukraine Crisis and African Economies

Vegetable Oils Market Disruptions: Income and Food Security Effects

In response to the Russia-Ukraine conflict and its impact on African countries, AKADEMIYA2063 developed the Ukraine Crisis Brief Series, a comprehensive research series to provide evidence-based simulations of the ramifications of the crisis. Hinged upon data, analytics, and past crisis patterns, the AKADEMIYA2063 Ukraine Crisis Brief Series analyzes the economic and socio-economic impacts of global market disruptions induced by the Russia-Ukraine conflict. These research findings are published on AKADEMIYA2063's Ukraine Crisis and African Economies portal.

Session VI of the AKADEMIYA2063 Ukraine Crisis Webinar Series will discuss vegetable oils market disruptions and the resulting impacts on income and food security.

Based on AKADEMIYA2063's Ukraine [Brief 7](#), "The Income and Food Security Effects of Vegetable Oil Market Disruptions," the session will shed light on the rise in vegetable oil prices and their implications for African countries. The speaker will also discuss African countries' exposure and vulnerability as a result of their reliance on oilseed imports from Ukraine and Russia.

Discussions will focus on the four countries covered in [Brief 7](#) – Ghana, Malawi, Mozambique, and Uganda, highlighting that the effects of disruptions in the oilseeds sector are less pervasive than those observed for the wheat or fertilizer sectors.
